Last updated: 2021/1/24 22:41 Hot Topic Check out the Obsidian Festival event guide here! Test your tag combination with this Open Recruitment Tag Simulator tool for Arknights. Select the combos and character tag filters to simulate the porridge straps you can get in the game! Check out the entire list of operators Select your criteria/tags[Update January 20, 2021] We have updated the calculator and added operators. Delete All confirmed class type tag By selecting your preferred combination, you can filter the characters that you can remove from that specific tag combination. Up to 3 combinations can be selected at a time. Try different combinations that can produce the rarest characters9 Time Wait is highly recommended Until you specifically search ★1 or ★2, it is recommended to select a 9-hour wait. The longer the wait, the more likely you are to get a character that matches your selected profile. Learn more about Open RecruitmentSenior Operator & Top Operator tags are Guarantee Rare Drop Senior Operator & Top Operator tags will produce ★5 & ★6 as a rare guaranteed drop. Use these rare labels wisely to select rare units of your choice. Some tags are rareSome tags in open recruitment are rare and may take some attempts before they appear as an option. You can use Office to update tag selection, but be sure that tag roll rees take time before they can be used. See the guide the office hereSome operators cannot hireSome operators, new and old, cannot be obtained through hiring. These characters can only be had by getting them through Headhunt. However, there is still the possibility that these operators can be added in a future update. Overview Recruitment is available after 0-2 has been completed. Initially the player only has the procurement strip (meaning that only one contract can be made at a time), but the construction and improvement of the Human Resources Office on the basis increases the number of hiring slots, up to 4. Before carrying out recruitment, the player must determine the recruitment time and tags to use. Each contract costs LMD and a Recruitment Permit; the construction and improvement of the Human Resources Office reduces the hiring rate by 10% at level 1, 20% at level 2 and 30% at level 3. The Accelerated Plan can be used to instantly complete recruitment, which does not change the outcome. Recruitment time Recruitment time can be set between 10 minutes and 9 hours, in 10-minute increments. The longer the time, the less likely the labels are to be crossed out (see below), but the cost of LMD also increases. Setting the hiring time to at least 4 hours will eliminate 1★ Operators and add 5★ Operators, while setting it to at least 7 hours and 40 minutes will remove 2★ Operators. Tags There are five recruitment tags available in each recruiting slot, which decides what type of Operator will be recruited. All five are randomly selected and not all are always available (see Tips), and the player can collect up to three tags at once. Once the contract is complete, the Operator will have the labels chosen unless they are crossed out, which can happen in the following situations: Randomly during the recruitment process, especially if the hiring time is too short. If the player selects two mutually exclusive tags (for example, Medic and Guard), one or both will be crossed out. Possible labels are listed below, color-coded green for the common ones, blue for the semi-common, orange for the most common, and red for the rare: Rating Robot, Senior Operator, Starter, Top Melee Operator Position, Caster Distance Class, Defender, Guard, Medic, Sniper, Specialist, Supporter, Vanguard Specialization AoE, Crowd-Control, DPS, DP-Recovery, Debuff, Fast-Redeploy, Defense, Healing, Nuker, Shift, Slow, Invocation Support, Survival Available tags can be upgraded once an office is built. An upgrade opportunity is generated every six hours, up to a maximum of 3, but some operators can speed it up when assigned to work in the human resources office. Operators The following are the Operators available from contracting on the Global/EN server as of December 30, 2020. In contrast, the following Operators are not available from contracting on the Global/EN server as of December 30, 2020: Amiya is given as one of the and when 2-10, 3-8, 4-9, 6-17 and 7-18 is first erased. Grani, Flamebringer, Ceylon, Bison, Snowsant, Absinthe, Folinic and Sideroca can only be obtained from Grani and the Knights' Treasure, Operational Intelligence, Heart of Surging Flame, Code of Brawl, Forge Ancient, Children of Ursus, Twilight of Woloumonde and Darkknights Memoir events, respectively. Savage is given as a pre-registration reward and the Celebration of the 1st Anniversary. Ethan and Breeze can be purchased with the Certificate of Purchase from the Store's Coupon Store. Courier, Gavail and Dur-nar can be purchased with Credit at the Credit Store. Bibeak can be purchased with Contract Bounty in the Permanent Trade Center section of the Secret Contingency Contract Sanctuary. The rest is only available from headhunting. Nian and W are only available in their respective limited banners (Earthborn Metals and Cremation Last Wish, respectively). The following operators that are currently only available from headhunting on the Global/EN server had been added to the RECRUITMENT group on the CN server as of January 19, 2021: Hellagur Magallan Schwarz Astesia Executor Glaucus Myrtle Sussurro Vermeil Mechanics Tips While the exact rate of hiring labels has not yet been revealed from official sources, it is clear that the rarity of tag combinations is determined separately from the tag set, which would mean that the label generation process is done in two steps: The game determines the minimum and maximum rarity of operators that would appear from recruitment. From several observations, it is seen that 3★ are the most commonly selected; 2★ are semi-commonly selected; 4★ are not selected uncommonly; 1★ and 5★ are rarely selected; and 6★ are very rarely selected. The game randomly selects tags and tag combinations that result in Operators from the minimum and maximum rarities. As such, if during a tag generation process the game decides to choose 3★ and 4★ such as the Minimum and Maximum Rarities of the Operator, respectively, then the generated tags and their combinations will result in at least one Operator 3★ and at most one Operator 4★. This also gives the following implications: Several rare and rare tags that guarantee at least 4★ Operators sometimes appear together (i.e. support, fast-redeploy, and Shift at the same time) with or without common and semi-common tags that would ensure specific operators. Combinations of common and semi-common tags that guarantee specific 5★ Operators (i.e. Defender/Defense and Survival guaranteed by Vulcan, or Caster and Healing guaranteeing Nightmare) rarely appear together. Because of that, recruitment depends more heavily on luck than head hunting, but there is a positive side: since the labeling process as explained above remains unchanged, this means that while the rates of certain tag combinations are adjusted to suit the new additions each time the recruiting group is updated, the overall rate at which operators of a certain rarity appearing in recruitment are adjusted equally. Assuming the player didn't choose labels that guarantee 4★ or higher Operators and sets the contracting time to at least 7 hours and 40 minutes, the rarity of the Operator that appears by the contract is as follows:[1] 3★: 73% (common) 4★: 26% (uncommon) 5★: 1% (rare) General Try to choose a combination of labels that guarantees at least one Operator of 4★ or specific specific the player is watching. Remember to set the hiring time to maximum (9 hours) to reduce the chance that any of the tags will be crossed out. If the player wants to get Robot Operators (Castle-3, Lancet-2 and THRM-EX), don't forget to set the time to a maximum of 3 hours and 50 minutes, as more than that will remove them from the search to be 1★ Operators. If the tag set did not guarantee specific operators, the player can set the time to 7 hours and 40 minutes to save LMD, being as short as possible to guarantee at least 3★ Operators and a maximum of 5★ Operators. If the player is lucky enough to get the Senior/Top Operator tag, always select any of them and set the hiring time to the maximum! As long as the time is set to a maximum of 9 hours, the Top Operator tag will never be crossed out unless a counteracting tag (for example, Starter) is selected. Under the same condition, the Senior Operator tag rarely, if ever crossed out. At the beginning of the game, players should try to maximize the potential of their Operators through recruitment, as seen above, 3★ Operators are the most common sight in the recruitment process. Later in the game, recruitment is a great source for the Certificate of Qualification and Advanced Certificate, especially if the player was lucky enough to get 4★ Operators most of the time. All current tags will be updated when new operators are added to the group of operators that can be recruited. Therefore, tags should be used as soon as the player receives them.
